

Landowner's Guide ~ To ~ Streamside Living

The Landowner's Guide to Streamside Living Version 2 ***- Kings River Watershed of Northwest Arkansas***

The Kings River Watershed Partnership is proud to offer this updated guide to assist landowners with the many questions and issues that arise when living and working next to a stream. We have made every effort to provide an accurate summary of each issue, but this information should be used only as a guide and not as a substitute for legal council. This guide is specifically written for folks living in the Kings River Watershed located in Northwest Arkansas, but many of the principles could be used for streamside living nationwide. The vast majority of lands in the Kings River Watershed are privately owned, so the decisions that individual landowners make today are extremely important to the long-term health of the watershed.

The Kings River Watershed Partnership

The Kings River Watershed Partnership (KRWP) is a 501 (c)(3) nonprofit committed to protecting the environmental and economic components of the Kings River Watershed through a locally based voluntary effort. The group is striving to further scientific study, education, and the cooperation of all users of the Kings River and its tributaries. For more information, please visit our website: www.kingsriverwatershed.org or find us on Facebook.

Acknowledgements

The original creation of this guide was funded by the Kings River Watershed Partnership and the Arkansas Natural Resources Commission. This updated edition is made possible by our generous sponsors, as seen in the back of the guide. Please visit their businesses and let them know how much you appreciate them!

We are also grateful to the local artists who offered us beautiful photos to use in this guide.
